

Application Number 10/531069
Response to the Office Action dated May 9, 2008

Amendments to the Specification:

This listing of the paragraphs of the specification will replace all prior versions of the corresponding paragraphs of the specification in the application.

Listing of Amended Paragraphs of the Specification:

Please amend a part of the paragraph from page 3, line 22 to page 3, line 25 read as follows:

That is, the present invention provides:

(1) A capsule comprising a tablet, granule or fine granule and a gel-forming polymer, wherein ~~the~~ a release of an active ingredient is controlled ~~and a gel-forming polymer~~;

Please amend the paragraph beginning on page 14, line 15 to read as follows:

The present invention relates to a pharmaceutical composition containing a tablet, granule or fine granule, wherein the release of active ingredients is controlled, or a pharmaceutical composition containing these tablet, granule or fine granule and a gel-forming polymer, which delays digestive tract migration speed. The pharmaceutical composition of the present invention may be these tablet, granule or fine granule itself, or a form of a mixture of a tablet, granule or fine granule and a gel-forming polymer, or a capsule form in which the pharmaceutical composition is filled-in-capsule, but ~~a the capsule form~~ is preferred in particular. It has been cleared that the persistence of blood levels after oral administration is remarkably prolonged by these combinations.
